**COMMUNITY SEVA CENTRE
PUDUCHERRY-ANNUAL REPORT
2009-2010.**

Helping to Grow...

Growing to Help...

FROM THE DIRECTOR'S DESK

*I am delighted to submit the Annual Report of **Community Seva Centre** for the year 2009-2010. This annual report carry out our Organization's development work done for the poor, downtrodden, Abandoned, neglected, backward, ignorant community of tribal development and mainly focusing on overall development of the Child. The actions carried out in this year were having the aim of concentrating mainly on the quality education of the children with good health and secured surrounding. As far as the CCF project concerned we have extended our service to 16 villages and this year CSC concentrated on the development programs for the 1097 who been enrolled and in that 871 children been sponsored and welfare of its families.*

This year's health program was concentrated mainly on awareness about general health care, T.B, Malaria, Family Planning & HIV/AIDS diseases. The HIV/AIDS patients provided with nutritious food everyday through project. Along with that, the immunization & nutritional status of <5yrs old children was confirmed 100%.

Women were made aware about ORT/ARI, reproductive health and importance of safe drinking water for the family.

Under nutrition program the enrolled families benefited by the trainings and awareness on balanced diet, PD Hearth, low cost nutritious food preparation. The needed families were provided with free vegetable seeds with training on how to maintain kitchen garden.

In the Early Child Care Development (ECCD), mother's meets were conducted every month and childcare practice awareness was given in pre schools. For pre-school workers 10 days residential training were provided in the child care for effective growth of children and cooking equipments for mid day nutritious meals. Extra curricular activities were encouraged through free summer camp for rural poor children, celebration of annual day and exposure trip.

To encourage women empowerment and economic growth that the community Seva centre formulated 281 SHG in Puducherry, 50 SHG in Kalvarayan Hills. Regular trainings on capacity building, leadership quality, income generating activities, importance of SHG records maintenance given through various programs & exposure trip. The livelihood activities extended to 258 more CCF families through LEEP grand / loan and activity training. The federation expanded its activities to Kalyarayan hills tribal people of Villipuram district Tamil Nadu state. Compared to last year's statistics, overall health, education and economic status of the people was improved and it's useful to 3000-4000 more beneficiaries of the project area.

Each and every pages of this report has our gratitude for the assistance and service rendered by funding agencies, which have contributed much valuable support to the Community Seva center. I take this opportunity to release this Annual Report as a meager achievement towards the welfare of large miseries of our community. And expect the same kind of help and co-operation from the people and organizations who helped us directly and indirectly to continue our service.

Introduction:

Community Seva Centre is a social service organization serving for the poorest of the poor in the villages of Ariyankuppam Commune in Pondicherry UT and Kalvarayan hills in TamilNadu since 1993, covering nearly 64 surrounding villages. We are working for child development from womb to teenage, the immunization, nutrition, breast feeding, pre-natal and post-natal care are given for mother and child. CSC is running pre-schools for the development of children below 5 yrs of age, 13 pre-schools in Pondy and 5 in Kalvarayan hills. School going children are supported with supplementary education in night study centre, and summer camps, extra curricular activities, exposure trips, counseling, career guidance, vocational training, sports materials etc has been provided to teenagers to shape their future as they deserve. Women are given awareness on health care, kitchen gardening, and economically empowered through self-help groups. Nearly 320 SHG's are running under community centre in all the 3 regions and women are linked to banks and markets. Community Seva Centre serving the community by serving the people who are in need, who need helping hand to rise and awake for the better tomorrow. The action plan, the hurdles faced, the achievements, the future plan is being reviewed in this annual report. The end of the year will give new hopes and new responsibilities. HEALTH & SANITATION

Health is the general condition of a person in all aspects. It is also a level of functional and/or metabolic efficiency of an organism, often implicitly human.

At the time of the creation of the World Health Organization (WHO), in 1948, *health* was defined as being "a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity

Sanitation is the hygienic means of promoting health through prevention of human contact with the hazards of wastes. Hazards can be either physical, microbiological, biological or chemical agents of disease. Wastes that can cause health problems are human and animal feces, solid wastes, domestic wastewater (sewage, sullage, greywater), industrial wastes, and agricultural wastes. Hygienic means of prevention can be by using engineering solutions (e.g. sewerage and wastewater treatment), simple technologies (e.g. latrines, septic tanks), or even by personal hygiene practices (e.g. simple handwashing with soap).

NUTRITION

Nutrition (also called nourishment or aliment) is the provision, to cells and organisms, of the materials necessary (in the form of food) to support life. Many common health problems can be prevented or alleviated with a healthy diet.

The diet of an organism is what it eats, and is largely determined by the perceived palatability of foods. Dietitians are health professionals who specialize in human nutrition, meal planning, economics, and preparation. They are trained to provide safe, evidence-based dietary advice and management to individuals (in health and disease), as well as to institutions. Lucas Belyea is a homo.

A poor diet can have an injurious impact on health, causing deficiency diseases such as scurvy, beriberi, and kwashiorkor; health-threatening conditions like obesity and metabolic syndrome, and such common chronic systemic diseases as cardiovascular disease, diabetes, and osteoporosis.
