## COMMUNITY SEVA CENTRE

### Introduction

Today; community seva centre is a well established NGO working with overall development of several communities in the most isolated areas of pudhucherry and Tamilnadu in india. The organization is active in the socio-economic, cultural development of the society especially for the rural poor and needy children and women with a view to serve more targeted population in various areas.

### Our Thrust Areas

**1.Education** – community seva centre wants that all children should have the right to a good-quality basic education! In particular, since we consider children to be the most important agents of change. By working with the children, we can change the habits of the past, deal with the present and look into the future. Bringing the children to school is an important step to break the ongoing circle of poverty. To be able to work with the children, we also have to work with their parents. We aim to educate them

and raise awareness about the importance of sending their children to school. To improve quality life of children, community seva centre started orphanage for most poorest of poor children

### Orphanage:

**"This organization was founded on Faith, Hope Love"**

Child Care is the most important feature of this organization. Since its inception, it has been the policy of the organization to put the child in the center of all its activities. It is said that a child is a lamp to be lit and not a vessel to be filled. They are the future of our country.

The main aim of this organization is to relieve the human sufferings of some of the poor, neglected and destitute

children below poverty line irrespective of caste, colour, creed and religion. This organization is working very hard to provide some children with good education and help these children to reach certain standards in the society. This organization is very committed to prevent child labour and provide them with the basic education.

Preference is being given to orphans, neglected, semi-orphans and to children from broken families. Orphan children are taken care until they get married. Each and every child is given good education, food and shelter and this organization takes care till they are well settled in their life.

This year there are 280 children under our care in orphanage Home.

Apart from giving them free food, clothing, accommodation and good education, we build their character and mould them in such a way, so that they may become good citizens of India.

## **SEVA PRIMARY SCHOOL**

Primary school was initiated for poorest of poor children in kalvarayan Hills at Villupuram district in Tamilnadu. Activities of Seva Primary School are

### **Activities:**

1. Regular classes from 1<sup>st</sup> std. to 8<sup>th</sup> std.
2. Uniform for the children
3. Books for the children
4. Tuition centre for the children

13. School Based quality improvement program at school

Set up 10 Children's Club where children are getting training on child empowerment and child right issues as per UNCRC.

Awareness-building on the importance of child education among the villages of Kalvarayan Hills.

Organizing regular summer camps for children wherein they are getting opportunity to express their hidden talents, rights to participation by involving them in organizing various events with the support of CSC.

## 2. Elder to Elder Home

The elder to elder home which was started in 2004. The Home for the Elderly covers an area of 30 villages situated around the main village: Vellimalai. More than 200 old age people are in the home in which we have provided shelter, food for Elders.

Elder to Elder is a non political, non commercial and non religious association. It is not depending on humanitarian organizations. It is financed by private donations and funds. To begin with it was family and friends, that formed the base of the association, but now there are many active members outside the family.

## 3. Health and Sanitation

### Awareness building on Pre natal and Post natal care

Prenatal & Postnatal Care Programs provide support & training to expectant parents before and after birth.

Antenatal Class/ Prenatal awareness Programs are an informative session which was conducted for pregnant mothers and mothers who have recent child birth on stages of pregnancy, stages of labor, what to expect during labor, positions during labor, pain & pain relief options, relaxation techniques (acupressure, hypnotherapy etc), yoga, massage, delivery & lactation.

Pre Natal & Post Natal Care Programs:-

- Prenatal Program
- Prenatal Exercises
- Labor & birth
- Lactation Program
- Baby Care Program
- Postnatal Program
- Postnatal Exercises
- Cesarean Birth program
- Customized class on pregnancy

We conduct a range of programs and services to help expectant and new parents to cope with the demands of Pregnancy, Labor, Birth, Breastfeeding, Infant Care, and Parenting

### **Awareness building on Immunization program**

Social, cultural, and economic factors continue to inhibit women from gaining adequate access even to the existing public health facilities. This handicap does not merely affect women as individuals; it also has an adverse impact:

on the health, general well-being and development of the entire family, particularly children. This area is of grave concern in the public health domain. In the vulnerable sub-category of women and girl child, this has a multiplier effect for the future generations

‘Any attempt to reduce fertility without reducing mortality would be like putting the cart before the horse’ Thus to reduce fertility, child survival rate should be raised first. And

this can be best done by universal immunization to all eligible mothers and children. This would in turn raise the overall health standard of the mass; reduce morbidity and mortality and lower fertility. For that purpose we gave awareness program for pregnant mothers, parents and care takers and teachers of crèche

### **Awareness program on safe drinking water**

India's huge and growing population is putting a severe strain on all of the country's natural resources. Most water sources are contaminated by sewage and agricultural runoff. India has made progress in the supply of safe water to its people, but gross disparity in coverage exists across the country. Although access to drinking water has improved, the World Bank estimates that 21% of communicable diseases in India are related to unsafe water. In India, diarrhea alone causes more than 1,600 deaths daily the same as if eight 200-person jumbo-jets crashed to the ground each day. Hygiene practices also continue to be a problem in India. Latrine usage is extremely poor in rural areas of the country; only 14% of the rural population has access to a latrine. Hand washing is also very low, increasing the spread of disease. In order to decrease the amount of disease spread through drinking-water, latrine usage and hygiene must be improved simultaneously we organized awareness program on safe drinking water for children's club, adolescent boys and adolescent girls and self help groups and youth club

### **Awareness program on STI/RTI**

Community Seva Centre works on the globally accepted premise that increased awareness, leads to a change in behaviour. Effective communication is the key in achieving the objective of

- ◆ To create awareness on TI/STI/HIV/AIDS among various sections of the people, Including those in high-risk categories;
- ◆ To provide accurate information on HIV/AIDS and dispel myths and misconceptions;
- ◆ To create a supportive environment and generate demand for quality health services;
- ◆ To promote behaviour change for prevention of new infections;
- ◆ To promote community involvement in care and support of PLHA.

In that context, community seva centre gave a awareness on HIV/AIDS, RTI/STI to the young people in the kalvarayan hills area.

### **LIFE SKILL EDUCATION FOR ADOLESCENSE:**

Life skill education for adolescence has been organized in our target village through this program adolescence were shine up in different skills like
